New Notice
UTV-78612
JB Fluorspar Mine
Received 5/26/00

Ed Ginouves
BLM
176 E. D.L. Sargent Drive
Cedar City, Utah 84720

Dear Ed:

Please find enclosed a notice for the JB Mine. The area has been previously mined, open cut on a small scale. It is impossible to exactly map the location of our proposed work. I have dotted and area that is the area in which we intend to explore further.

Work would include cleaning out the open cuts, trenching across veins, and removing possible ore materials for testing. The entire area, while vegetated to some degree is either open cuts or stockpiles from open cuts (spoil).

New work in this area will then constitute bulldozer, trackhoe, possible blasting and R.C. drilling. Total new disturbance within the outlined area of previously disturbed areas will likely not exceed 3 acres. Vegetation will be removed from the stockpile areas so as to not contaminate them. If enough ore is found, then a small crusher will be set up at some point to process it.

This operation, if successful, will produce about 10,000 tons per year of fluorspar. All reclamation will be done according to CFR 3809 regulations. If you have any questions, please do not hesitate to call.

Sincerely

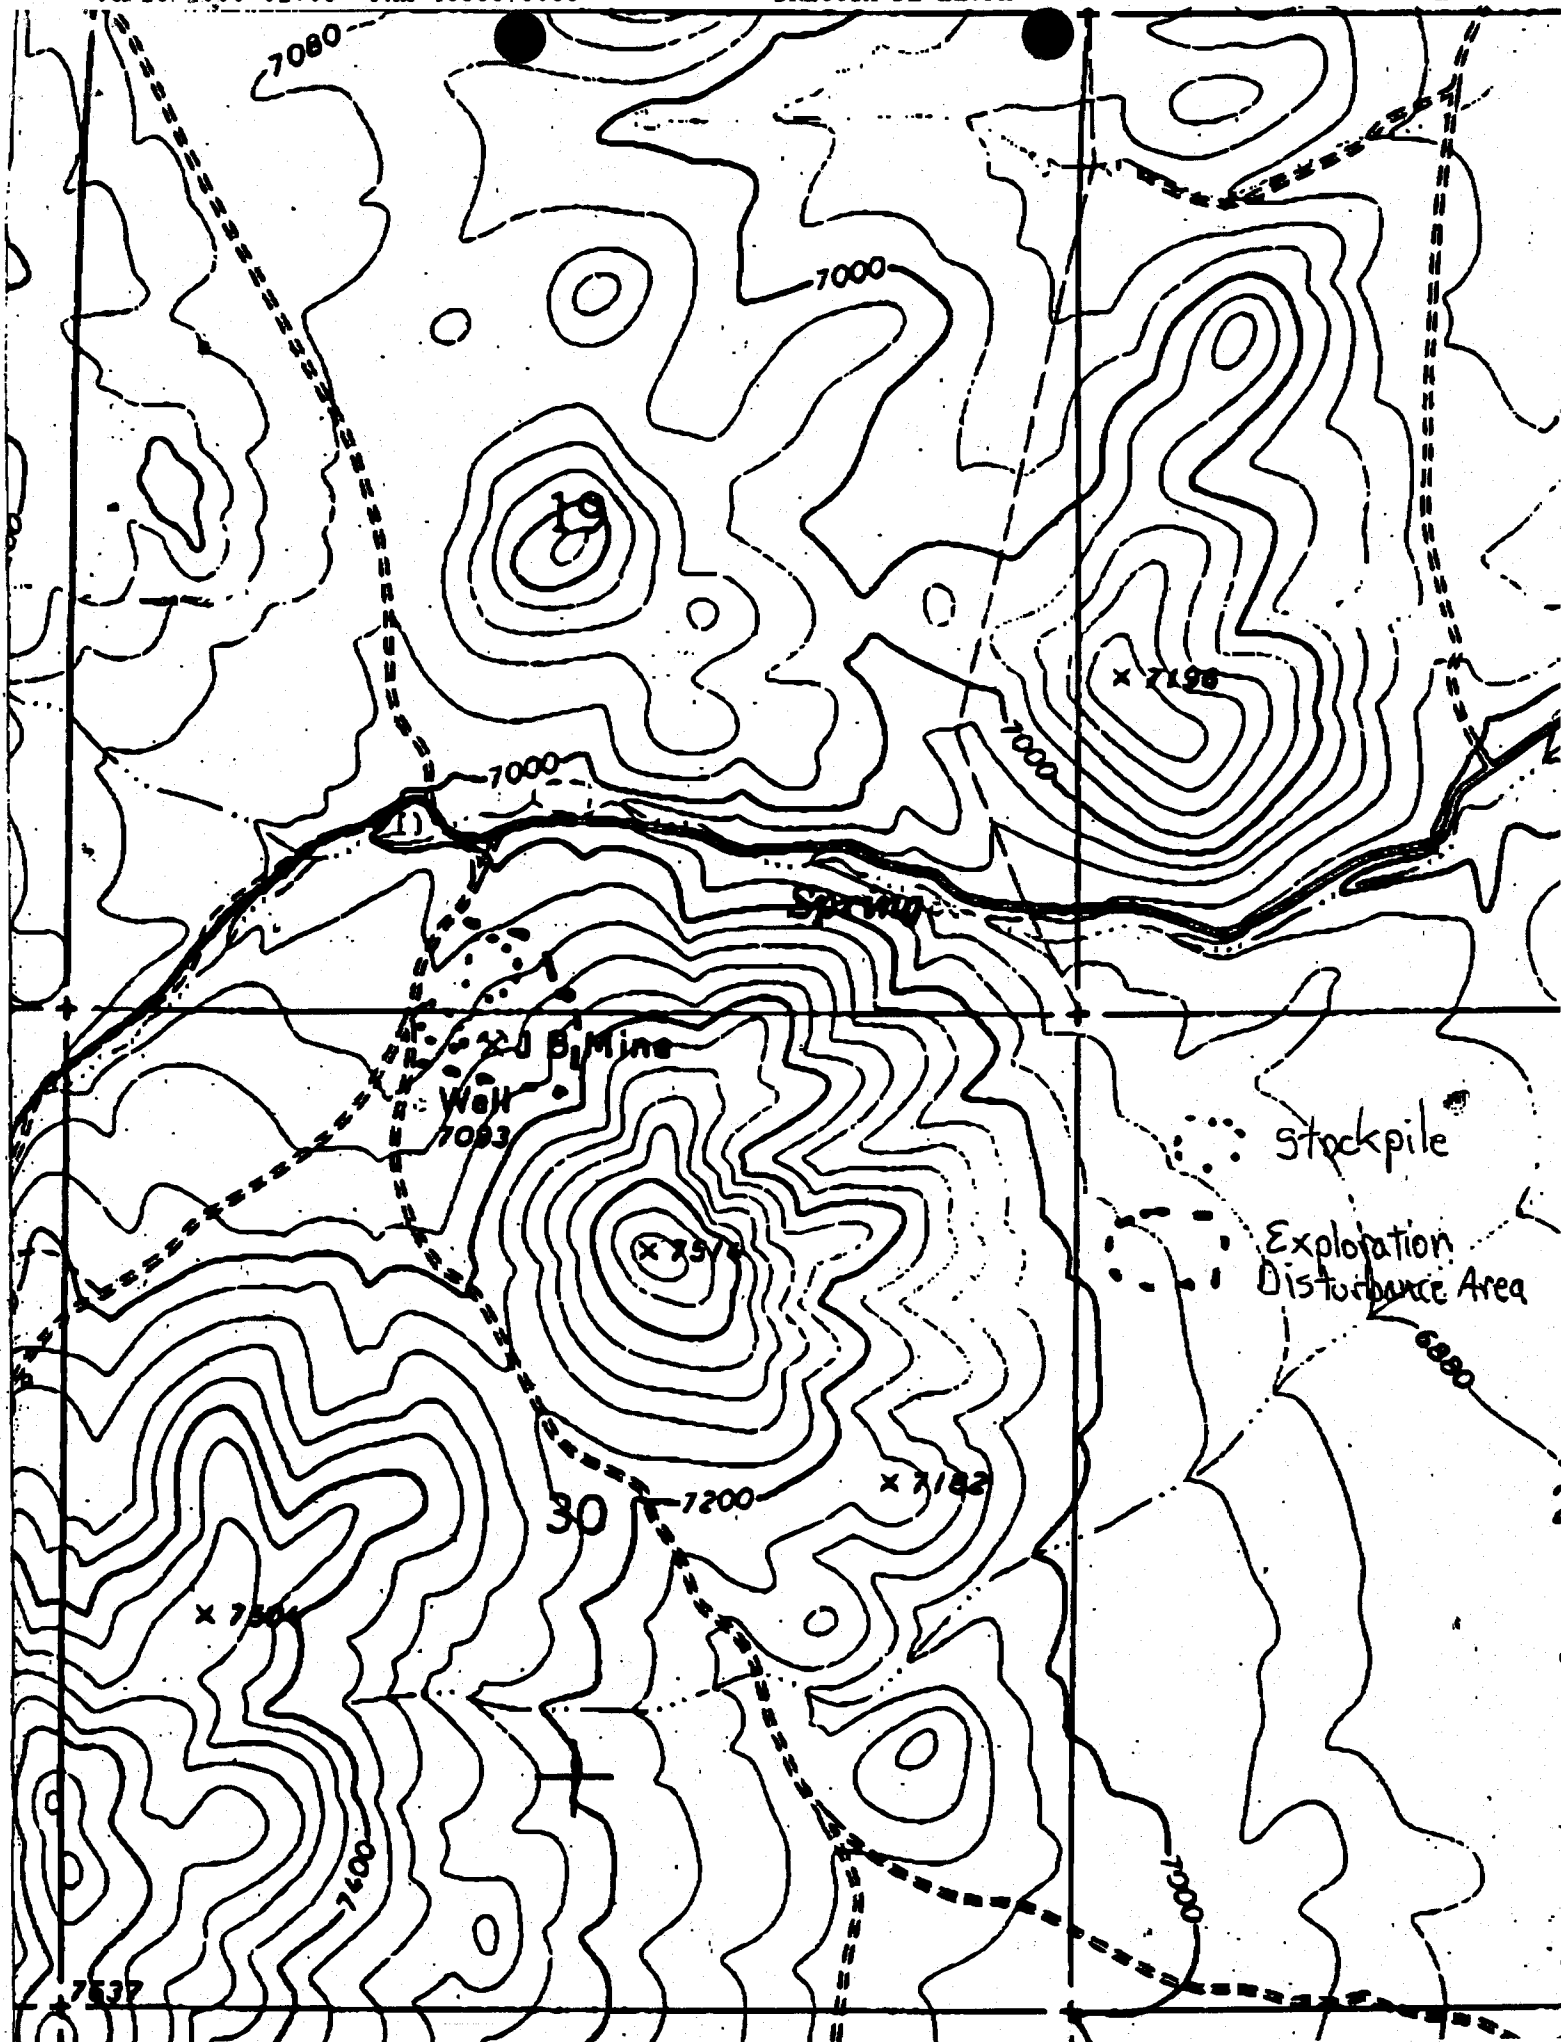

Mark D. Dotson
President, Breccia Development, Inc.

Subject: **Site Examination Request**

Case Name: JB Fluorspar Mine (New Notice), Breccia Development, Inc.

Case Number: UTU-78612

Type: 43 CFR 3809, Bulk Sampling, Surface Excavation, Exploration Drilling

Date Received: May 26, 2000

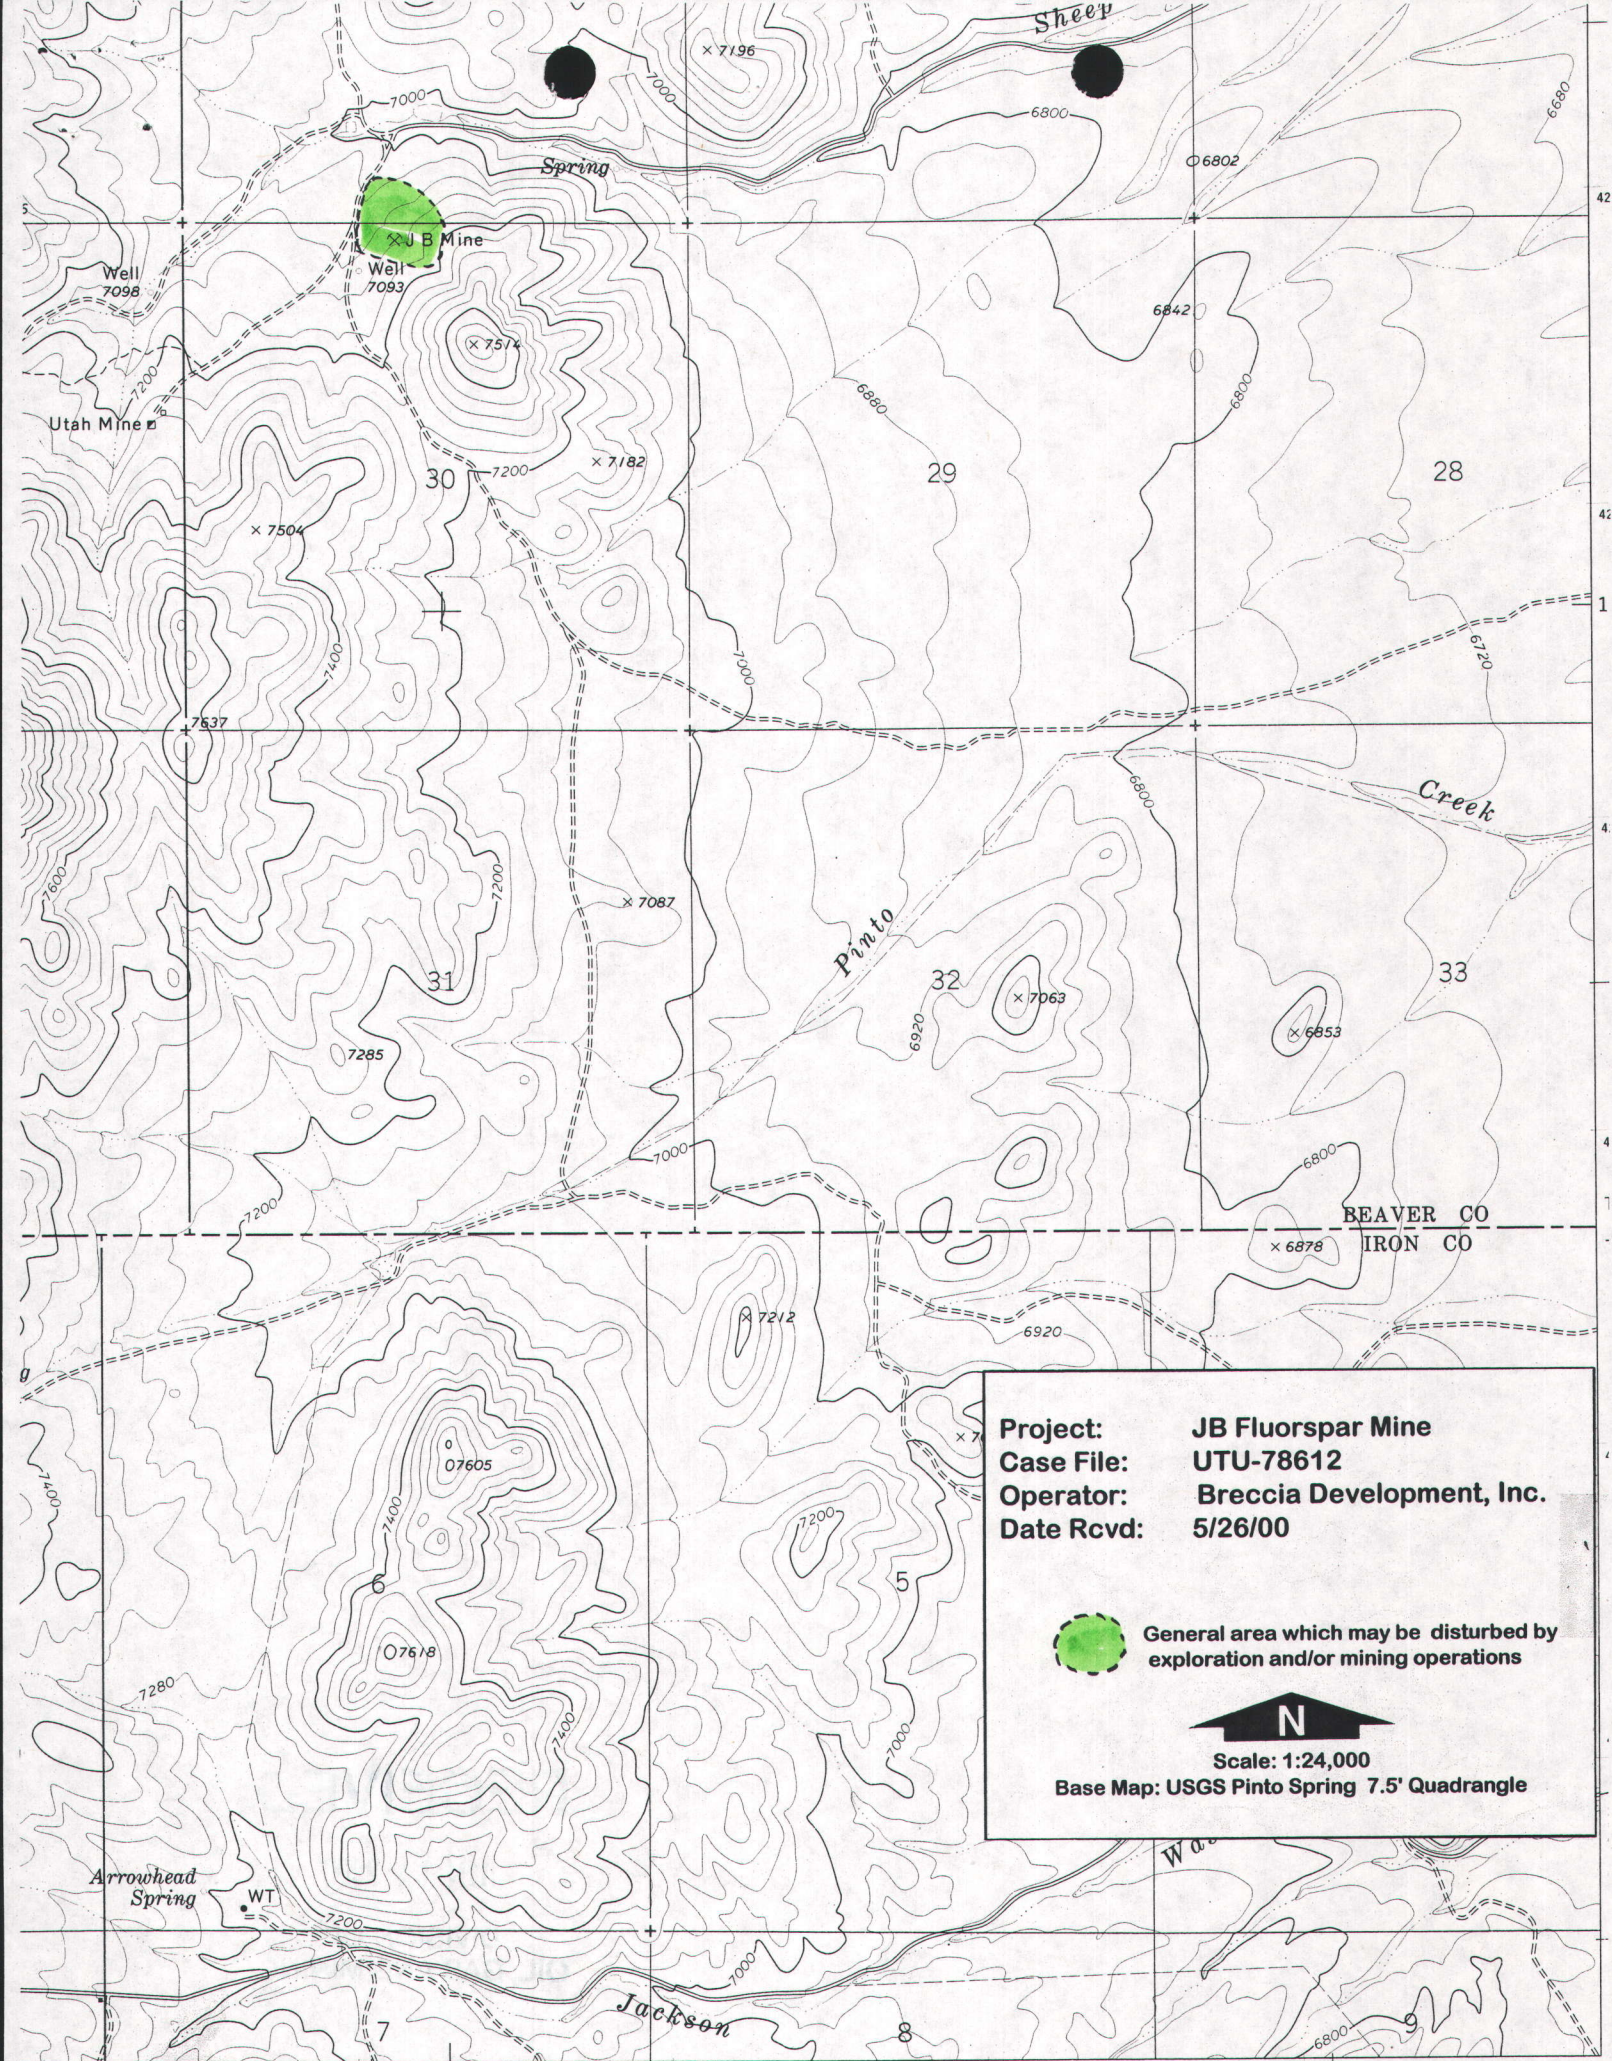

Date Needed: No later than 15 calendar days after date received

Legal Description: T. 30 S., R. 17 W., Sec. 19: SE $\frac{1}{4}$ SW $\frac{1}{4}$ and Sec. 30: NE $\frac{1}{4}$ NW $\frac{1}{4}$, Beaver County, Utah;
Sheep Creek, east side of Indian Peak Range

Location Info: Fastest access is Jockey Road to Sheep Creek Road, then west on Sheep Creek Road 5.5 miles to pre-existing mine site.
Wah Wah South 1:100,000 land status quadrangle; USGS Pinto Spring 7.5' quadrangle;
See attached map.

Proposed Action: This mine site (JB Mine) was a fluorspar mine which was last active in the early 1970's (pre-law). I have mapped the site and ~ 7 acres were originally disturbed of which ~ 4 acres have re-vegetated through natural means. The notice proposes trackhoe and bulldozer excavation within existing disturbed areas. Exploration and mining work will be conducted within a general area that is outlined on the attached map. One of the two existing stockpiles of low-grade fluorspar will likely be removed from the site. The existing open cut will likely be expanded and deepened. There is a potential for ongoing small-scale (<5 acres) mining operations at the site.

Total area to be disturbed (within the general the area) : up to 5 acres.
